SISLEY SPRING SUMMER 2026

Elegance in Motion

From the city's pulsing rhythm to the warm embrace of the year's hottest season, Sisley Spring Summer 2026 explores an elegance in constant evolution. Deconstructed volumes and fluid lines blend with fabrics that catch the light and move with ease: each piece is a gesture of refined simplicity. In this season of harmonious contrasts, tailoring meets summer freedom, and linen is evoked as a premium fibre, defining a bold, contemporary and effortless style.

WOMEN

Spring opens with soft silhouettes and refined materials that shape volume and gently reflect the light. Shiny cupro and viscose pair with comfort-fit blazers and classic suits. Cocoon coats with textured surfaces, barrel trousers and denim with micro-abrasions express a femininity that celebrates nuance. Unexpected details – trench coats with drawstrings, adjustable cape-style padded jackets, detachable hoods and animal-print dust coats – add a surprising edge. Viscose knitwear with a crinkled finish completes the look, its sophisticated, intentionally irregular textures echoed in menswear-inspired shirts.

As summer arrives, linen takes centre stage: linen-viscose blends and stretch, slubbed fabrics with a raw feel alternate with fluid lyocell sets such as sarong bermudas and flowing skirts. Tailoring becomes lighter through sharply cut vest-dresses and relaxed matching sets. Crochet and embroidery on lightweight bases convey a true sense of summer. A digital print, luminous brushstrokes and denim with subtle sheen generate an evocative look, while draped tops and stretch polos balance generous volumes with elegant silhouettes. A femininity that unites practicality and freedom with natural ease and refinement.

MEN

The Sisley SS26 man is the perfect balance of urban energy and refined comfort. In spring, he moves through neutral tones, fluid fabrics and deconstructed suits that reference sportswear without sacrificing elegance. Track-suit-inspired outfits with galvanised metallic details celebrate a balance of discipline and modernity. Shirts in poplin, lyocell and Tencel deliver formal softness, alongside premium jerseys in mercerised or compact cotton. Minimal bombers and jackets in suede or faux leather define a clean, essential outerwear offering.

In summer, cotton-linen-lyocell mélanges emerge as the key fabric: fresh, sophisticated and versatile, ideal for zip-up jackets, lightweight shirts and linen-viscose suits. The lower half of the wardrobe becomes more fluid, with parachute-canvas trousers, regular chinos and chambray denim in light washes. Open-stitch knitwear, cotton crêpe, linen-effect textures and faded washes evoke a sense of quiet premium, where style and comfort naturally meet.

ACCESSORIES

SS26 accessories strike a refined balance: sculptural shapes, artisanal weaves, glossy finishes and tactile textures mark the transition from city to summer. For spring, black patent bags with asymmetric cuts and metallic hardware recall urban moods, alongside an exploration of animal prints for those who want to stand out without losing versatility. For summer, woven eco-leather belts and straw hats with metal-wire cores bring a light, luminous, handcrafted touch. Snake-effect textures, slanted zips and glossy finishes speak of discreet seduction, while black-and-white maxi petals adorn sarongs and kaftans like delicate shadows in a garden at dusk.
