TEST REPORT

Number: TURA220029902

Summary of test results:

Suppliers with indirect discharge are expected to have conventional parameters complying with their legal wastewater discharge permit and/or commercial agreements with the receiving central effluent treatment plant, Regulation/Standard information for discharged wastewater as well as the limitation value (or contractual limit value agreed by CETP) for the required parameters indicated in results section. Therefore, there should not be any negative consequences if these suppliers do not meet the requirements of the conventional parameters set forth in ZDHC Guideline v1.1 Appendix A Tables 1A-1B. ZDHC aims to use the collected test data to define a set of conventional parameters and limits specific for indirect discharge suppliers.
